

INFRASTRUCTURE DYNAMICS

SUSTAINABLE UTILITIES FOR A BETTER TOMORROW

EveraTREAT MINI

Wastewater Treatment System

Durable

Robust

Simple

Available in capacities from
2,500 GPD to 25,000 GPD

- No more concrete & FRP tank farms!
- No more complicated yard piping!
- No more hydraulic profile problems!
- No more concrete tank failures!
- No more waiting around for cranes, electricians, and plumbers!

Image: EVT 5K-IFAS rated at 5,000 GPD

Perfect Application for:

- Small Residential Subdivisions
- Restaurants, Hotels, Mixed Commercial
- Campgrounds, RV Parks, Mobile Home Parks
- Rural Institutional Facilities (Schools, Parks, Athletic Fields)
- Data Centers, Office Parks, Business Parks

INFRASTRUCTURE DYNAMICS

SUSTAINABLE UTILITIES FOR A BETTER TOMORROW

EveraTREAT MINI

Wastewater Treatment System

- **Single Tank Design:** Incorporates Primary Settling, Flow Equalization, IFAS Aerobic Treatment, and Secondary Clarification into one structure.
- **Upgrade Options:** EVT MINI can be supplied with additional functionality such as influent and effluent pumping, tertiary filtration, disinfection systems, modular equipment buildings, remote monitoring & control systems.
- **Rugged Construction:** Structurally Reinforced Thermoplastic (SRTP) tank resists corrosion unlike concrete and steel tank treatment systems
- **Factory Complete:** electrical controls, pumping systems, and aeration systems are factory installed, tested, and ready for operation when delivered
- **Easy to Install:** The lightweight SRTP tank construction is easy to receive, offload, and maneuver into place. Connect Inlet & Outlet Piping and make a single power connection and the EVT MINI is ready to operate.
- **Simple Operations & Maintenance:** Pumps, Blowers, and Controls are easily serviced.....uses common spare parts that do not require specialized electrical or plumbing skills.
