SUSTAINABLE UTILITIES FOR A BETTER TOMORROW

## EveraSKID

Modular Wastewater Treatment System

Fast

Durable

Simple

Available in capacities from  
2,500 GPD to 25,000 GPD

- Above-Ground, Rapid Installation
- Simple Connections just Inlet, Outlet, & Power
- Reduced Site Construction Complexity
- Factory-Complete System Delivery
- Corrosion-Resistant Construction
- Rapid Commissioning

Image: EVS 5K-IFAS rated at 5,000 GPD

### Perfect Application for:

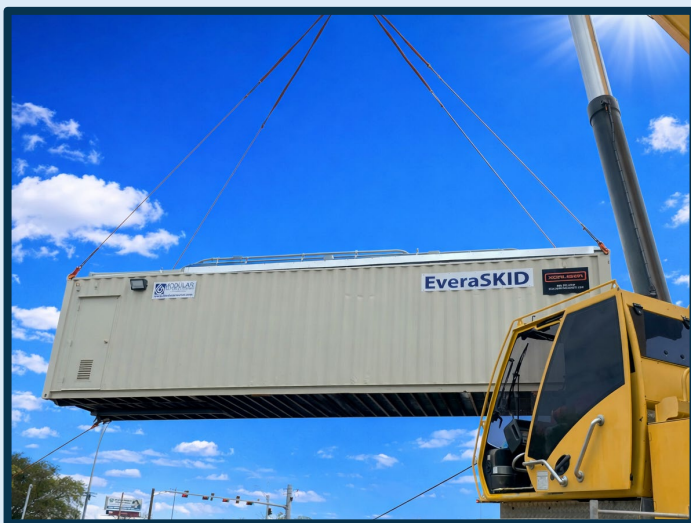

- Residential Subdivisions & Developments
- Commercial & Mixed-Use Projects
- Data Centers & Business Parks
- Campgrounds, RV Parks, Remote Facilities
- Municipal & Decentralized Wastewater Systems

## EveraSKID

### Modular Wastewater Treatment System

- ▶ **Factory-Assembled Modular System:** Delivered as a complete treatment package with integrated equipment, controls, and piping.
- ▶ **Above-Ground Installation:** Installed on a simple concrete pad with minimal site work required.
- ▶ **IFAS Biological Treatment:** Provides consistent, high-performance secondary treatment with reduced footprint.
- ▶ **Corrosion-Resistant Construction:** Engineered materials eliminate long-term degradation common with concrete and steel systems.
- ▶ **Rapid Installation:** Typical installation completed in **less than one day**, significantly reducing project schedules.
- ▶ **Enclosed System with Odor Control:** Improved aesthetics and odor containment compared to open or buried systems.
- ▶ **Remote Monitoring & Autonomous Operation:** Supports modern controls for reduced operator involvement and improved system visibility.
